

OneNeck for State & Local Government

Connecting Citizens to Solutions

How can OneNeck help you connect your citizens to solutions?

OneNeck provides an end-to-end, technology-independent approach that includes a complete suite of hybrid IT offerings across infrastructure, applications and managed services. This approach enables governments to realize benefits, not only internally but externally as well, leading to happier, more productive citizens.

What do OneNeck solutions help customers do?

Connect with citizens in a secure and seamless manner

Foster mobility

Govern in a more agile and efficient manner

Improve transparency, performance and governance

What are the benefits?

OneNeck's solutions support government organizations leading to:

- Freedom to focus on core competencies
- Cost savings that increase returns on technology investments
- Consistently reliable IT delivery for improved productivity and customer service
- Improve security by implementing best practices to protect valuable data and resources

Why OneNeck

OneNeck has expertise leveraging a broad range of technologies and services will help you operate more efficiently. We provide an end-to-end, technology-independent approach that includes a complete suite of hybrid IT offerings across infrastructure, applications and managed services. This approach enables governments to realize benefits, not only internally but externally as well, leading to happier, more productive citizens.
